DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 22, 26, 27 and 28 are finally rejected under 35 U.S.C. 102(b) as being clearly anticipated by Glover 959,054, as set forth in the Office action mailed September 25, 2002.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 29, 30, 34 and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Glover, '054, as set forth in the Office action mailed September 25, 2002.
5. Claims 23-25 and 31-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Glover '054 in view of Cote et al, 5,534,106, as set forth in the Office action mailed September 25, 2002.

Response to Arguments

6. Applicant's arguments filed November 13, 2002 have been fully considered but they are not persuasive. Applicant argues that Glover, in disclosing "different degrees of fineness varying gradually and uniformly from the center to the outer edge of the disc in all directions" does not anticipate or fairly teach "at least two polishing regions having distinct polishing characteristics". The examiner strongly disagrees. In providing a coarse abrasive region in the center of the disc, and a fine abrasive region on the outer periphery of the disc, it is clear that Glover provides at least two polishing regions with distinct polishing characteristics. While the middle concentric annular region is the area where the coarse abrasive region is graded to the fine abrasive region, it also has a distinct polishing characteristic, different than that of the coarse or fine abrasive regions.
7. The examiner agrees with applicants' argument that Neff does not disclose the claimed invention, and that rejection has been withdrawn. However, as the rejection based on Glover, alone or as modified by Cote et al, this action is made final.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3723

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
